

Ehsan Moradpour

Web Developer

Dortmund, Germany · ehsan.webent@gmail.com · github.com/ehsanmim · [Open to new projects](#)

PROFILE

Developer with seven years of experience building back ends that move data through stages, from media pipelines through search indexing to CI/CD. Version control and testing take priority, and I work test-driven. With AI in the mix I build more automation, my own MCP servers included. Laravel and React at hulle24 since 2023, applied computer science alongside it, finishing 2026.

EXPERIENCE

E-commerce Full-Stack Developer (part-time)

hulle24 GmbH · Jan 2023 – present · Germany

- Full-stack planning and development of a complete online shop: Laravel on the back end, React on the front.
- Built the search with Typesense.
- Media pipeline with responsive variants generated automatically, stored in S3-compatible object storage.
- Implemented the CI/CD pipeline for the shop.
